## WORK EXPERIENCE

### Grab – Sr. Web Engineer

Jakarta, Indonesia – Mar 2021 - Present

Grab is a Singaporean decacorn transportation company. Currently, Grab has numerous products as a superapp and I am helping the development of the Reporting team on Merchant Experience.

*Technology used:* ReactJS, Redux, Jest

#### *Accomplishments:*

- Developed several new features and maintained Grab Merchant Portal (<https://merchant.grab.com>).
- Maintained Grab Merchant Central (<https://merchantcentral.grabpay.com>).
- Improved unit test coverage percentage by 30% on Grab Merchant Portal.

### Global Tiket Network (Tiket.com) – Sr. Frontend Engineer

Jakarta, Indonesia – Jul 2019 - Mar 2021

After about 2 years as mid, I was promoted to Senior Frontend Engineer. I've learned to work and grow together as a team. At first, our team only consisted of 3 people, and now our team consists of 9 people.

*Technology used:* ReactJS, Redux, GraphQL, Jest

#### *Accomplishments:*

- Developed a new hotel desktop & mobile web v3 (<https://tiket.com/hotel>).
- Developed new hotel extranet (administrator dashboard) (<https://tix.tiket.com>)
- Initiated and built numerous components to be reused by tiket.com frontend teams (<https://www.npmjs.com/package/@tiket-com/react-ui>)

### Global Tiket Network (Tiket.com) – Frontend Engineer

Jakarta, Indonesia – Oct 2017 - Jul 2019

Tiket.com is an Indonesian online travel agent founded in 2011 which provides services to order flight tickets, hotel rooms, events/concerts tickets, attractions tickets, train tickets and also car rental. Working at tiket.com is one of my greatest working experiences because I have learned to build a good looking and functional website for our customers.

*Technology used:* ReactJS, Redux

## SKILLS

**Frontend:** HTML, CSS, JS, SASS, React, Redux, Jest, Webpack, JQuery, GraphQL

**Backend:** PHP, Node.js, ASP.NET, Laravel, CodeIgniter, Express

**Database:** MySQL, PostgreSQL

**Others:** Python, Java, C#, Unity, Wordpress

## LANGUAGES

English, Bahasa Indonesia

### ***Accomplishments:***

- Developed hotel mobile web v2 using ReactJS (<https://m.tiket.com/hotel>).
- Developed hotel marketing manager dashboard (<https://tiket.com/admin>)

## **Globalnet Aplikasi Indotravel (GAI) – Backend Engineer**

Jakarta, Indonesia – Mar 2017 - Oct 2017

GAI is an Indonesian startup company which was acquired by Global Tiket Network in late 2018. We had two products, Tiket Kereta Api (mobile app) and Indonesia Flight (<https://indonesiaflight.id>). Tiket Kereta Api is an app to order train tickets and Indonesia Flight is an app to order flight tickets and hotel rooms.

As a backend engineer, I collaborate with frontend engineers and also the business team. We strive to deliver fastest and most efficient results. Due to the small number of teams, I also have to work agile and dynamics towards any changes.

***Technology used:*** Node.js, MySQL, Redis, JQuery, Pug

### ***Accomplishments:***

- Developed location dashboard and map pin point for hotel location.
- Contributed to developing payment service.

## **Bina Nusantara Group (BINUS) – Junior Programmer**

Jakarta, Indonesia – Mar 2014 - Mar 2017

Bina Nusantara Group is a group company of my university. I got an opportunity to learn and work while studying as a scholar. I worked in the General Affair, Marketing & Binus Center team which handles numerous web apps that are used by GA & Legal Department, Marketing Department and Binus Center.

***Technology used:*** ASP.NET, ASP.NET MVC, T-SQL, JQuery

### ***Accomplishments:***

- Developed Employee Assessment Test (Pauli Test and Questionnaire) for Binus Center.
- Developed a new marketing dashboard.
- Added feature to claim online-taxi voucher for General Affair & Legal Department.
- Maintained & developed Binus Center Backoffice Web.
- Maintained & developed Legal Backoffice Web.
