Work experience

Sr. Frontend Engineer

2019 - Present

Global Tiket Network (Tiket.com) – Jakarta, Indonesia

Tiket.com is an online travel agent founded in 2011 which provides services to order flight ticket, hotel room, events/concerts ticket, attractions ticket, train ticket and also car rental. Working in tiket.com is one of my great working experience because I have learned to build a good looking and functional website for our customers.

I also learned to working and growing together as a team. At first, our team only consisted of 3 persons, and now our team consists of 9 persons.

Technology used: *ReactJS, Redux, GraphQL*

Accomplishments:

- Developed new hotel mobile web app using ReactJS (<https://m.tiket.com/hotel>).
- Developed new hotel extranet (administrator dashboard) using ReactJS (<https://tix.tiket.com>)
- Built numerous components to be reused by tiket.com frontend teams

Frontend Engineer

2018 - 2019

Global Tiket Network (Tiket.com) – Jakarta, Indonesia

Tiket.com is an online travel agent founded in 2011 which provides services to order flight ticket, hotel room, events/concerts ticket, attractions ticket, train ticket and also car rental. Working in tiket.com is one of my great working experience because I have learned to build a good looking and functional website for our customers.

Technology used: *ReactJS, Redux*

Accomplishments:

- Developed new hotel mobile web app using ReactJS (<https://m.tiket.com/hotel>).

Backend Engineer

2017 - 2018

Globalnet Aplikasi Indotravel (GAI) - Jakarta, Indonesia

GAI is a startup company which has acquired by Global Tiket Network on late 2018. We had two products, Tiket Kereta Api (mobile app) and Indonesia Flight (<https://indonesiaflight.id>). Tiket Kereta Api is an app to order train ticket and Indonesia Flight is an app to order flight ticket and hotel room.

As a backend engineer, I collaborate with frontend engineer and also business team. We strive to deliver fastest and most efficient results. Due to small number of team, I also have to work agile and dynamics towards any changes.

Technology used: *Node.js, MySQL, Redis*

Accomplishments:

- Developed location dashboard and map pin point for hotel location.
- Added feature on payment service.

Junior Programmer

2014 - 2017

Bina Nusantara Group

Bina Nusantara Group is a group company of my university. I got an opportunity to learn and work while studying as a scholar. I worked in General Affair, Marketing & Binus Center team which handles numerous web app that used by GA & Legal Department, Marketing Department and Binus Center (<https://binuscenter.com>).

As a junior programmer, I developed and maintained web apps according to my Project Manager or System Analyst requirements.

Tehcnology used: *ASP.NET, ASP.NET MVC, Microsoft SQL, JQuery*

Accomplishments:

- Developed Employee Assessment Test (Pauli Test and Questionnaire) for Binus Center.
- Developed new marketing dashboard.
- Added feature to claim online-taxi voucher for General Affair & Legal Department.
- Maintained Binus Center Backoffice Web.
- Maintained Legal Backoffice Web.
- Maintained Desktop Application for Binus Shop (University & School).
